I would like to express myself to the FCC about the NAB petition to end XM Radio Instant Traffic and Weather. I feel this is a bad idea. First off I am paying a monthly charge to get this service and it is a service I use quite often. I am in the process of relocating from Ca. to AZ. The wonderful thing is that I can get the weather and traffic info in Phoenix no matter where I am, and I am sure that when I finally move there, it will be a useful tool in getting to where I have to be, ON TIME. As I mentioned before, I pay a monthly fee for this service that XM radio provides and I wish to keep it on the air!

Thankyou,
